MAY/JUNE 2019

Summer in Mount Prospect!

FRIDAYS ON THE GREEN CONCERT SERIES

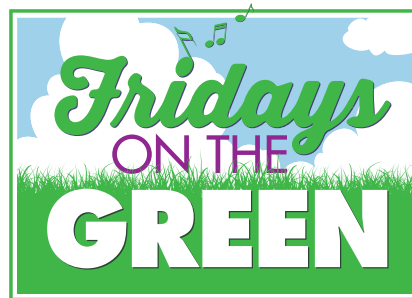

A Mount Prospect tradition continues this summer with the Fridays on the Green Concert Series. The concerts take place on select Fridays from 6:00 to 8:00 pm on the Centennial Green, located outside of Village Hall, 50 South Emerson Street. This free concert series is a great way to wrap-up the work week. Bring your friends and family and relax on the Village Green. This is a kid friendly event so the little ones are encouraged to attend. Bring blankets or chairs and settle in for some great music. Bring a picnic or pick up dinner at one of the Village's many downtown restaurants to eat on the green. You can also grab a bite before or after the concert, and enjoy hanging out in downtown Mount Prospect.

This year's musical line-up features bands performing the hits of

'80s and '90s, R&B, country, and more. We have included some old favorites and some new faces.

Free parking is available at the Emerson Street Parking Deck, the Metra Commuter Lot (after 5 pm) and throughout downtown. For more information, visit experiencemountprospect.org.

Mount Prospect Police Dept.
A Run with the Police Five-0 5K Run/Walk
Saturday | July 27 | 8am

All net proceeds will benefit the Mount Prospect Food Bank.

Building and Inspections Department

Don't Be Taken Advantage of After a Storm

Spring and summer can bring severe weather, and with that, some unscrupulous home repair contractors. These storm chasers appear after a round of intense weather and use various techniques to gain the confidence of home owners. The first rule to follow is to never work with a contractor who shows up at your home without an invitation or appointment. In addition, watch for these suspicious behaviors:

- Telling you that you or your home are in danger if you don't make immediate repairs
- Talking too quickly, providing confusing information or answers to questions, and pressuring you to sign a contract right away
- Quoting a price that seems excessive; always get at least one competing bid to compare
- Offering to drive you to your bank to withdraw funds to pay for their work
- Can be reached only by leaving a message with an answering service
- Driving a vehicle without a company name or logo on it or one with out of state license plates
- Asking you to pay for the entire job up front

Finding a Contractor

If you are looking to hire a contractor for home repairs, be sure to find out as much about them as you can before making any commitment. You can do this by calling the Illinois Attorney General and the Better Business Bureau. Always get written estimates from several firms, but don't automatically choose the lowest bidder. Ask the contractor if subcontractors will be used on the project. If yes, ask to meet them, and make sure they have current insurance coverage and licenses. Also ask them if this contractor has paid them on time in the past.

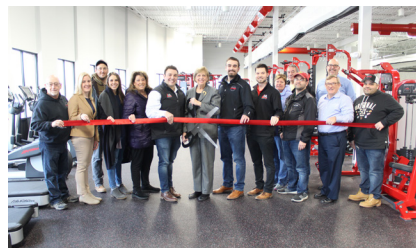

Did You Purchase a Vehicle Sticker?

The deadline for displaying the 2019-2020 vehicle sticker was April 30. As of May 1, the Police Department may issue citations to locally registered vehicles if a current sticker is not displayed. If a citation is issued for not having the current period sticker, the recipient may have to pay a fine, the basic cost of the sticker, and a late purchase penalty. The penalty does not apply to new residents/businesses or to those who have purchased vehicles after May 1; in these situations, there is a 30-day grace period in which to purchase a sticker. During the grace period, proof of vehicle purchase or move-in date is required to ensure that a penalty is not imposed. Residents who change vehicles during the year should remove the sticker from the vehicle and contact the Finance Department at 847.392.6000 with updated vehicle information to determine eligibility for transference of the sticker from one vehicle to another for no additional fee.

Community/Economic Development

New Apartment Building Slated for Central Plaza Property

After sitting vacant for more than 3 years, a key parcel that serves as a gateway to the downtown will soon be home to a new apartment complex. In March, the Village Trustees approved zoning for a new five-story, 97-unit apartment building on the northwest corner of Central Road and Main Street. Known as 10 North Main, the property will be designed by OKW Architects, a leading design firm in the region.

The building will be constructed of high-end materials, including stone, brick, cement board, and glass, and will feature a 900 square foot indoor amenity area and a 1,300 square foot rooftop terrace.

When complete, the addition of new residents to the area is expected to generate \$300,000 in annual property taxes, in addition to providing a boost to the many fine restaurants and merchants in the downtown area.

The development team includes First Equity Group and the Harlem Irving Companies. These firms are leaders in the development industry with extensive experience including some notable projects such as 811 Uptown, the Link, and the proposed 15-acre Hyatt Regency redevelopment in Schaumburg.

Business Retention and Expansion Program Returns

Improving our business community and strengthening our economic status remain as key objectives for the Village. To meet these objectives, we welcome suggestions, comments or concerns from the members of our business community. As a means of establishing dialogue, the Economic Development Commission (EDC), conducts periodic visits to businesses to gather feedback that we hope will strengthen government/business relations and facilitate economic growth in our community. For any questions related to the program, or Economic Development Commission initiatives, please contact the Community Development Department at 847.818.5328.

Annual CommUNITY Breakfast

Thursday, May 2nd is the National Day of Prayer and the Mt. Prospect Chamber of Commerce invites you to spend time in positive reflection that morning at the Annual CommUNITY Breakfast. The doors will open at 7:00 am with a buffet breakfast scheduled for 7:30. The program will run from 8:00 to 9:00. The event takes place at Bristol Palace Banquets, 828 East Rand Road. Attendance is \$30 per person or \$200 for a table of 8.

To reserve your spot please RSVP to meghan@mountprospectchamber.org or call 847.398.6616. Payments may be sent to the Mount Prospect Chamber of Commerce at 46 East Northwest Highway, Mount Prospect, Illinois 60056. We hope you will join us for this special day.

New mixed-use development coming to Downtown Mount Prospect!

On April 9, 2019 the Village Board approved a Conditional Use for a Planned Unit Development (PUD) and an associated Redevelopment Agreement with the developer, Nicholas and Associates, to redevelop one of the Village's prime downtown sites located at the southeast corner of Maple Street and Prospect Avenue. Currently, the subject property consists of a commuter surface parking lot, an office condominium building, and an unimproved gravel lot, which was previously home to the wood-working manufacturer, Parenti & Raffaelli. The new mixed-use development known as Maple Street Lofts will include the following:

- A new 268-space public parking deck
- A 6 story mixed-use building containing more than 14,000 square feet of retail space and 192 luxury rental units
- A 7 story, 65 unit luxury rental building
- 56 single-family residential rowhomes

This development is located in the Prospect and Main TIF, and is projected to generate over \$17 million dollars in tax increment over the life of the TIF. TIF revenues are used to cover the cost of the Maple Street Parking Deck, stormwater improvements on-site, will help support downtown projects which help alleviate traffic congestion and improve pedestrian walkability, among other costs. Please check out the Village website mountprospect.org/MapleStreetLofts, for additional information.

Public Works

Public Works Open House

The entire family is invited to join Mt. Prospect Public Works Department for our Open House on Saturday, May 18. Join us from 9 am to 1 pm at the Public Works Facility, 1700 West Central Road for displays, equipment, literature and more, all highlighting the many functions performed by our great employees year round.

P.W. Paws will be on hand to assist with games, give-aways, and special *rides* while guests enjoy food, fun and balloons.

Don't miss this terrific opportunity to learn more about Mt. Prospect Public Works.

Become a Better Recycler with the Recycle Coach App

Residents can now become better and more active recyclers by downloading the Recycle Coach app. Available for computers, mobile devices and through digital assistants like Amazon Alexa or Google Home, Recycle Coach makes it easy for Mt. Prospect residents to get local disposal information on thousands of household items with a simple voice command. And the best part is it's absolutely free!

With Recycle Coach, you can:

- Get organized with custom curbside collection and events calendars
- Receive collection reminders and real-time updates on service interruptions
- Use the *What goes where?* search tool to get local disposal information and collection requirements for everything from everyday items to the more uncommon ones
- Check your status as a recycler by trying the *What type of recycler are you?* quiz to learn useful recycling tips and suggestions

Become a better recycler today by downloading the Recycle Coach app for free at the iTunes Store and Google Play or you can access the Recycle Coach widget on the village's website at www.mountprospect.org/departments/recycle-coach.

Only Rain Down the Drain!

Storm drains and roadside ditches lead to our inland lakes, streams, rivers and Lake Michigan. So, any motor oil, pet waste, leaves, grass clippings or dirty water from washing your car that enters a storm drain gets into our water without being treated. Never dump motor oil, chemicals, pet waste, dirty or soapy water, or anything else down the storm drain or into a ditch. All of these materials pollute our lakes and rivers! Pollutants that get into storm drains can poison fish, birds, and other wildlife, and can find their way into drinking water supplies. In addition, dirt, litter, branches and grass clippings can clog storm drains and cause flooding. Be sure to report anyone dumping materials into a storm drain or ditch to village officials.

10 Things You Can Do to Prevent Water Pollution

1. **Sweep up driveways and sidewalks instead of hosing them with water**
2. **Never dump anything down a storm drain or into a ditch**
3. **Plant bare spots in your yard**
4. **Compost your yard waste**
5. **Use fertilizers sparingly and avoid pesticides**
6. **Direct downspouts away from paved surfaces**
7. **Take your car to a car wash instead of washing it in the driveway**
8. **Check cars for leaks and recycle motor oil**
9. **Pick up after your pet**
10. **If you are on a septic system, have it inspected and pumped regularly**

Did you know that just four quarts of oil can form an eight-acre oil slick if spilled or dumped down a storm drain?

Street Resurfacing

Did you know that Mt. Prospect operates 136 miles of Village owned streets and alleys? In addition to maintaining those streets, the Village is also responsible for damaged sidewalks, curbs and utility structures located within the public right-of-way.

To efficiently and cost-effectively maintain this property, the Village implements an annual street resurfacing program. For 2019, over 7 miles of village streets will be resurfaced. If your block is one which will be serviced this year, you will receive a Resident Information Bulletin on your front door prior to the start of construction.

For the latest Street Resurfacing Program updates, please visit www.mountprospect.org/resurfacing. This webpage includes the project location map, the list of program streets, and weekly construction progress reports. Updates will also be posted on the Public Works Facebook and Twitter feeds.

If you have any questions regarding the Street Resurfacing Program, please contact the Public Works Department at 847.870.5640 or publicworksdept@mountprospect.org.

Call JULIE Before You Dig

If you are planning to dig on your property for any landscaping or home improvement project, you are required by Illinois law to contact the local one-call service or JULIE (Joint Utility Locating Information for Excavators) to locate any underground utilities before you begin. To arrange for a utility locate, call 811 or 800.892.0123. Please call at least 48 hours before the start of any excavating work. That time frame does not include Saturdays, Sundays or holidays.

You can help expedite the process by pre-marking the area in which you plan to work with white paint or white flags before the locator arrives.

For more information, visit www.illinois1call.com.

POT HOLES – The One Sign of Spring No One Likes

Pot holes in our roadways are caused by the expansion and contraction of water after it has entered into the ground under the pavement. When water freezes, it expands. Pot holes occur when snow and ice melt as part of seasonal freeze-thaw cycles. The reoccurring cycle of snow and ice melting throughout the winter season is the primary reason why potholes rear their ugly head on our streets.

The frequency of temperature fluctuations during any given winter will dictate the number of pot holes that develop. For instance, if the region experiences a relatively warm winter season the freeze/thaw cycles are fewer, resulting in fewer pot holes; the same is true if the region experiences a very cold winter where it gets cold and stays cold. However, the winters in which there are big swings in temperatures are when the roads take a real beating. The constant freeze/thaw cycles quickly disintegrate road surfaces and subsequently pot holes appear with a vengeance, which was the case this year.

Sometimes emergency pot hole repairs are necessary during extreme cold or inclement weather. These repairs are temporary in nature and are done quickly for the safety of motorists. The *throw-and-roll* method cleans the debris and water from the pot hole, fills it with asphalt material and compacts it, leaving a 1/8 or 1/4 inch crown. The material is compacted with a hand tamper or the truck tires. *Throw-and-go* differs from throw-and-roll in that there is no compaction. The filled pot hole is compacted by normal traffic.

Patching is the process of filling potholes or excavated areas in the asphalt pavement. Quick repair of pot holes or other pavement disintegration helps control further deterioration and expensive repair of the pavement. Without timely patching, water can enter the subgrade and cause larger and more serious pavement failures. A full-depth or deep patch is considered a permanent repair, while a thin surface patch or a *throw and go* pot hole repair is usually temporary. Materials for patching include hot mix asphalt, asphalt emulsion mixes, stockpile patching mixes, and proprietary patching mixes with special blends of aggregate and modified binders.

Full-depth patching is the removal of the entire pavement surface layer, regardless of its thickness, over the patching area. Deep patching is the removal of four inches or more of the pavement surface course. Full-depth patching applies to either asphalt or concrete pavements, but deep patching applies only to asphalt pavements.

Village crews do their very best to stay on top of filling pot holes, but we encourage our residents to report pot hole locations as they travel about the Village.

Lawn Sprinkler Requirements

To protect our public drinking water supply, the State of Illinois requires that all lawn irrigation sprinklers have cross-connection and backflow protection to prevent back-siphon and cross-connections. The state law requires that all backflow devices are to be certified by a State Licensed Cross Connection Control Device Inspector (CCCDI). If the system has been removed, please have your plumber/inspector notify Public Works.

A copy of the annual certification is to be sent to the Public Works Department as part of the State of Illinois monitoring requirements. For more information, please contact Public Works at 847/870-5640 or visit the village's website.

Get a Headstart on Tree Care

Now's the perfect time to begin your outdoor spring clean-up and get your trees and bushes started on a healthy season. Raking and gathering debris that has collected beneath trees is a great place to start; removing fallen twigs, leaf litter, and fruit is especially important for trees that are susceptible to fungal diseases. A good example would be Norway Maples leaves that had black leaf spot last season.

Once you've cleaned up the loose debris, take some time to conduct a visual inspection of the trees. Look for any damage that has occurred over the winter, including split limbs, broken branches, and deadwood, as now would be a great time to repair that damage and prune deadwood. A Certified Arborist should be contacted when taking care of your larger trees or bigger jobs not suited for the homeowner.

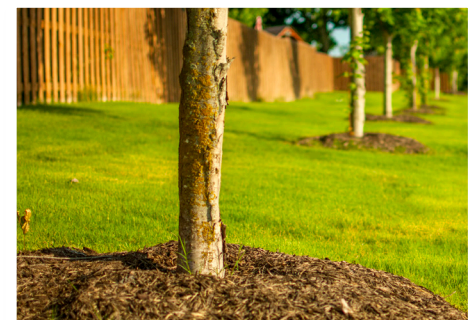

Spring is also a great time to fertilize trees before they enter the growing season. Fertilizing not only replaces nutrients, but also helps improve resistance to insect and disease damage. Be sure to check the label for specific timing of any products you intend to use.

Preventative insecticide applications for insects such as Emerald Ash Borer and many other early season insects should be done at this time.

Don't overlook mulching in spring. Applying mulch secures the organic matter beneath the soil surface, conserves soil moisture, and controls weeds when applied correctly. Aim for a 3-inch layer around trees, but do not pile the mulch directly up against the trunk. Doing so can hold moisture and heat, creating a point of entry for diseases. Mulching the area directly beneath the tree is one of the best things you can do for the health of your trees.

In spring, trees use stored energy to push out new growth. When spring rains aren't adequate, watering can help start your tree off to a healthy growing season that can continue all year long. Focus your watering on the critical root zone, which is the area directly beneath the tree, from the trunk to the furthest branch tips. Watering thoroughly, at least once a week, with the hose running at a trickle for a few hours will do wonders. This practice will moisten the soil rather than soak it, thereby preventing the water from simply running off the surface. A slow trickle allows the water to penetrate the ground, to roots that can be as much as 18 inches below ground.

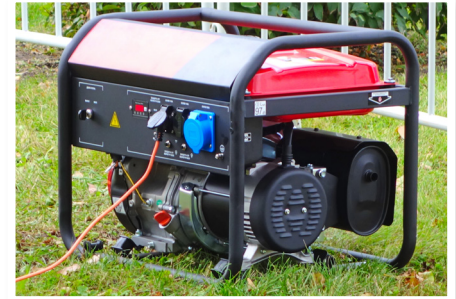

Following some of these simple guidelines, will help ensure the enjoyment and benefits of your trees for years to come.

Generator Awareness Event

Are you prepared to be without power during critical times? Are you interested in owning a generator for your home, work, or place of worship? The Village of Mt. Prospect Emergency Management Team is hosting a free generator awareness event on Wednesday, May 29, from 4:00 to 8:00 pm at Fire Station 14, 2000 East Kensington Road. If you currently own or would like to own a portable generator, or just have questions on purchasing, installing and maintaining a generator, please join us on the 29th.

This event is open to the public and was organized to give residents an opportunity to learn more about different types of generators. Attendees will have the opportunity to speak with representatives from the Village's Building and Inspection Services, Fire Department, Community Emergency Response Team, as well as local electrical contractors.

For more information or questions on this event, contact the Mount Prospect Fire Department at 847.818.5253.

Village Warning Sirens

The Village of Mt. Prospect maintains 6 warning sirens located throughout the community to notify residents of a tornado warning or a possible severe weather event. It is important to understand when Mt. Prospect sirens are activated, and what immediate actions must be taken for your safety.

Q: What should I do when I hear the warning sirens activate?

A: If indoors at the time of activation, seek shelter immediately in the lowest level of your house, preferably in an interior room away from doors and windows. Tune to radio or television stations for the latest information and remain in your place of shelter until the threat has passed.

If outdoors at the time of activation, seek shelter indoors; do not use a car or mobile home for shelter. If there are no safe options indoors and a tornado is imminent, lie flat in the nearest ditch or depression and use your hands to cover your head.

Q: When are warning sirens activated?

A: Warning sirens are activated when a confirmed sighting of a tornado tracking toward our community is reported by a trained weather spotter within Mt. Prospect or surrounding communities, with the receipt of a tornado warning that has been issued by the National Weather Service which includes Mt. Prospect, or with reports of significant ongoing storm damage due to winds of 70MPH miles per hour or greater, along with golf ball size hail in the vicinity.

Sirens will activate every 10 minutes until the immediate threat to the Village is over.

Village warning sirens are tested on the first Tuesday of every month at 10:00 am All public warning devices throughout the State of Illinois are tested at this same time.

Q: How do I know the threat of a tornado has passed and an all clear has been issued?

A: Neither the National Weather Service or the Village of Mt. Prospect issues an all clear signal. We recommend you tune into local radio and television stations for the most up to date information on the status of severe weather. A good rule of thumb is to wait 30 minutes past the last time you hear the warning sirens activate and conditions have improved.

Please do not call 9-1-1 when the warning sirens are activated unless you have an actual emergency.

Lightning Detection Systems

Commonly referred to as Thor Guards, lightning detection systems are often mistaken for the Village warning sirens. Businesses such as Park Districts and Golf Courses use systems to alert individuals of approaching lightning. These systems can activate any time lightning is detected in certain localized areas. Typical lightning detection systems activate to alert of pending lightning and will also notify an all clear of lightning.

Village warning sirens will activate continuously when there is a tornado warning or possible severe weather event for the entire Village. Village warning sirens DO NOT issue an all clear signal.

Fireworks Safety

The Mount Prospect Fire Department wishes all a safe Fourth of July celebration. Please keep in mind that due to the hazards and injuries associated with fireworks, the Village of Mt. Prospect prohibits all types of fireworks, including sparklers.

Each Fourth of July holiday, thousands of people, mostly children, are seriously injured in fireworks related incidents, about one-third resulting in permanent eye damage. Children and teenagers sustain 44% of these injuries. Sparklers, which reach temperatures of up to 1800°F and remain hot enough to cause serious burns even after they are extinguished, accounted for one-third of the injuries to children under five.

Fireworks are especially dangerous for children because they entice them to play with matches. The Mount Prospect Fire Department wants all of our residents to have a safe 4th of July celebration by enjoying our spectacular, and professional, fireworks display at Melas Park and by keeping fireworks out of the hands of children.

Police Department

Beat Meetings

The Mount Prospect Police Department invites residents and business owners to join the officers working in their patrol beat to attend upcoming beat meetings for recent information on crime trends and prevention tips. Attendees of beat meetings will also be entered into a raffle to win police department prizes, such as a police department coffee mug, police department t-shirt, a ride to school in a police car certificate and more. Need to find out what beat you are in? Check out the Police Beats page on the Village website.

BEAT	DATE	TIME	LOCATION
3164	Wednesday May 1, 2019	7:00 – 8:00 PM	Mount Prospect Public Works 1700 West Central Road

3162	Wednesday May 15, 2019	7:00 – 8:00 PM	John Jay Elementary School 1835 West Pheasant Trail
3170	Wednesday May 23, 2019	6:30 – 8:00 PM	Euclid Elementary School 1211 North Wheeling Road Learning Resource Center

Beware of Scam Artists

Summer brings an increase in the appearance of scam artists and con artists preying on elderly victims. Con artists often travel in groups of two or more by pickup trucks, station wagons or vans during daylight hours, looking for elderly victims working in their yards.

Con artists will pose as employees of utility companies, building inspectors, roofers, chimney repairmen, driveway seal coaters, body repairmen and handymen. They will quote a price for the work and later demand 5-10 times the quoted price.

In another scenario, con artists will lure victims out of the house to look at the driveway, roof, chimney, or trees in need of trimming, or if in the home, distract victims while an accomplice will search the home for money and jewelry.

Protect yourself by working only with legitimate contractors that either you contact or came recommended by a friend. Receive a written quote for repairs to be done prior to the work being started. Do not allow anyone into your home that you haven't invited. If you are ever in doubt of someone at your door or you do fall victim to a scam, please call 911 to assist us in catching these criminals and protecting others. If possible, copy down license plate information and a description of the suspicious person's vehicle to provide to the police.

Keep Your Dogs on a Leash

As the summer is upon us, more and more dog owners are out enjoying the beautiful weather with their four-legged friends. Under the Village Code dog owners or the person in control of a dog while in public or on private property in an unsecured area, are responsible for keeping the dog securely fastened to a leash or tether, and to properly clean up after the animal. A violation of either of these two sections of the Village Code may result in the owner or the person in control of the dog receiving a ticket and a fine.

Let's all keep our dogs on their leashes and pick up after them and let everyone enjoy the nice weather.

Street of the Week Program

Mount Prospect police will concentrate traffic enforcement on designated roadways for one week periods. Here are the dates and the corresponding roadways for the program in the months ahead:

- | | |
|---|---|
| May 6 – 12 Wolf Road | Jun 3 – 9 Lonquist Blvd. |
| May 13 – 19 Rand Road (Rt.12) | Jun 10 - 16 Elmhurst Road/Main Street |
| May 20 – 26 Central Road | Jun 17 – 23 Golf Road (Rt. 58) |
| May 27 – Jun 2 Northwest Hwy (Rt. 14) | June 24 – 30 Burning Bush Lane |

Human Services

Community Connections Center

Village families with school age children who have free or reduced lunch at school can receive an extra bag of food during the summer break through the Village's Food Pantry. Call the main office at 847.870.5680 or the Community Connections Center at 847.506.4930 to schedule an appointment for a financial assessment and learn more about local resources.

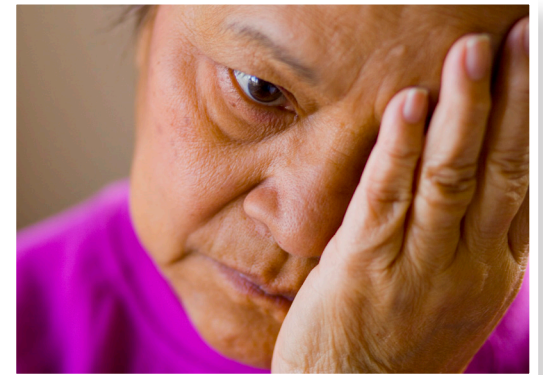

Hands-Only CPR classes

The Mount Prospect Fire Department will offer Hands-Only CPR classes to residents at the Community Connections Center on May 11th. Classes will be offered in English and Spanish. Please contact the Community Connections Center at 847.506.4930 for more information. Registration is required.

Special Information Available During Summer Months

May is **Mental Health Awareness Month** and June is **Elder Abuse Awareness month**. We invite Mt. Prospect residents to follow the Community Connections Center Facebook page and check our website for more information on addressing these important situations during those respective months.

Community Connections Center

You can see the Community Connections Center's monthly calendar, view current happenings and decide which programs you would like to attend through the Center's Facebook page. *Like* us at facebook.com/communityconnectionscenter

If you are interested in learning or improving your English in a friendly group setting, join us as we are once again offering our Conversations in English program. It provides a great opportunity for you to improve your English as you work with native English speakers. This program is offered every Thursday at the Community Connections Center. For more information and to register call 847.506.4930.
