

INTRODUCTION

The Village of Mount Prospect will soon begin construction of the Central Road and Cathy Lane Crosswalk Project that will also include dedicated left turn lanes on Central Road. This project will provide a modern crossing for pedestrians across Central Road leading to the Central Community Center. This includes a pedestrian refuge island and rectangular rapid flashing beacons, similar to the crossing at Melas Park and Central Road. Additionally, the project is expected to increase safety for vehicles by widening Central Road to provide dedicated left turn lanes at Cathy Lane, removing left turn queues from the travel lanes.

SCHEDULE

The Village has awarded a construction contract to Martam Construction, Inc. of Elgin, Illinois. Construction is scheduled to begin in mid-August 2023 and should be substantially complete in November 2023 with final completion in January 2024, weather permitting. The Contractor will complete roadway widening first followed by the pedestrian improvements. Overhead sign installation will be one of the last items due to long lead times on those products.

TRAFFIC CONTROL AND PROPERTY ACCESS:

Two-way traffic will be maintained at all times on Central Road. Cathy Lane will be closed to southbound traffic at Central Road and Millers Lane will be closed to northbound traffic at Central Road for roadway widening. Northbound traffic on Cathy Lane and southbound traffic on Millers Lane will be maintained at all times. Vehicles will be required to exit the neighborhood only at the right turn on southbound Millers Lane. See attached detour map. Detailed detour plans are on the project website. The detour is expected to be in place from August 17th to September 12th. Private commercial driveways being replaced as part of this project will be replaced half at a time, to maintain access for one vehicle lane at all times to private properties. The Village or Contractor will reach out directly to property owners to inform them of exact dates for partial entrance closures.

QUESTIONS DURING CONSTRUCTION?

Please visit the project website page for updated information throughout the project. Should you have additional questions, please contact us.
