

Dear Property Owner,

I value your time, so let's get right to the heart of the matter. The Village of Mount Prospect is taking a monumental step to ensure the safety of its residents—they're **replacing lead water lines, and the best part? It's absolutely free.**

Whether you're a homeowner, part of a multi-family dwelling, or own a commercial building, you are eligible to benefit from the Lead and Galvanized Steel Water Service Replacement Cost Sharing Program. For a limited period, **the Village will cover 100% of the cost to replace the service line** running from the water main to the B-box valve. To put it in perspective, the average cost of such a replacement is a staggering \$15,000. The **value of this program is undeniable.**

**However, there's a catch. The funding for 2023 is limited, and it's crucial that you make your move immediately.**

This is where we, at Green Tech Plumbing in Des Plaines, IL, come into play. We're not just offering a service; we're offering peace of mind. From obtaining the necessary permits to liaising with the city and executing the replacement, we've got you covered. We promise efficiency—the entire process is completed in just 1 – 2 days with limited interruptions to your service. **Secure your appointment by calling us at 847-518-5338.** If you need more information, our website [www.greentechplumbing.com](http://www.greentechplumbing.com) has all the details you might need.

Why is this replacement crucial? Lead exposure, especially in the elderly and children, can lead to **reduced IQ levels**, developmental challenges, learning disabilities, compromised kidney function, and a plethora of other **health issues**. Making the switch to a copper water service line is more than just an upgrade; it's a health imperative.

Time is ticking, and funds are depleting. Don't miss this golden opportunity. **Ring our offices today at 847-518-5338** for a risk-free assessment of your property.

Warm regards,  
Green Tech Plumbing Co.

**847-518-5338**
