

### Introduction

The purpose of this Resident Information Bulletin is to introduce you to a street lighting project planned for Rand Road. A key component of the Mount Prospect Strategic Plan established by the Village Board of Trustees is to improve the Village's corridor street lighting system. As part of this project, streetlights will be installed on Rand Road between Camp McDonald Road and Elmhurst Road in 2025. Two other separate Village projects will see the installation of street lighting along Rand Road from Elmhurst Road to Central Road in the next few years. These projects combined will complete the Rand Road corridor in Mount Prospect. The street lights will be silver aluminum poles with LED luminaires, like the ones installed on Rand Road near Central Road. Old ComEd lights on wood poles that currently exist along the project route will be removed at the end of the project. **At this time, it has not been determined exactly where the street lights will be located.**

### SCHEDULE

The Village has recently awarded a contract to SE3, LLS of Lisle, Illinois, to develop the necessary engineering plans and specifications. Their first task will be to perform a topographic survey collecting data along the street. It is anticipated that the survey work will take place in May/June. Once the engineering plans and specifications are complete, the Village will solicit bids from contractors to perform the construction. It is anticipated that construction will begin in 2025.

### PROJECT INFORMATION

A project web page has been created and can be found on the Village website at [www.mountprospect.org](http://www.mountprospect.org) under Departments, Public Works, Village Infrastructure Projects, Design Phase, Roadway Improvements, and Rand Road Lighting Project. You can also scan the QR Code below.

The project web page will periodically be updated throughout the project to provide the latest information, including the engineering plans, once completed. The Village will also send another Resident Information Bulletin prior to construction to let you know what to expect during construction.

### QUESTIONS?

For project updates, please visit the Village Infrastructure Project web page. The project is listed under Construction Projects and then Roadway Improvement Projects. Should you have additional questions, please contact us.
